

Please do not grant the petitions that have been filed with you to stop regulating broadband service. As a DSL customer of an independent ISP, I fear the ramifications of such an action by the FCC. I like my independent ISP because of the quality service I receive. If you stop regulating broadband service, my price with my independent ISP for DSL service will rise and I will have no choice but to contract with one of the large companies and will no longer have the quality service I have come to value.
